Cockerham Parochial C of E Primary School

Philippians 4:13 "I can do all things through Christ who strengthens me"

2022-23

Year B	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
			RE			
EYFS	I am special To give pupils an understanding that they are unique and special. To know they are loved, valued and made by God. Baby visit	Special People To give pupils an opportunity to explore Christian values through their own actions and the actions of others. To highlight the role of significant/special people in pupil's lives. To emphasise the ways in which Jesus was a special person. Christmas explore the nativity story in a variety of ways and ensure pupils know that Christmas is the celebration of Jesus' birth. Vicar visit	Stories Jesus told and Pupils will explore the stories that Jesus told and know that he told them to teach us about God. Stories Jesus heard Pupils will be introduced to stories of the Old Testament and understand that Jesus would have heard these stories as he was growing up.	Easter and Love Explore the events of Easter through a variety of multi-sensory experiences ensuring that pupils know it is a celebration of Jesus' death and resurrection.	Special Places Pupils begin to develop pupils understanding of a place being considered as a special/holy place where believers go to worship. Iman visit	Prayer Children start on their journey towards understanding what prayer is and the different ways people of faith talk to God. Prayer in different religions. Special Times Pupils develop understanding of special/holy times. Increasing their knowledge of the ways special times are celebrated, remembered and the reasons why. Pupils are introduced to the story of Pentecost and God as Holy Spirit.
Year 1/2	Harvest (1.1) The aim of this unit is to raise awareness that we harvest food all around the world and that we usually	Christmas (1.3) Creation (1.2)	Creation (1.2) Jesus (1.4)	Easter Celebrating new life (1.5) The aim of this unit is to give children an opportunity to reflect on the miracles of nature and new life during springtime. Pupils will hear and be able to retell the Easter Story. They will make links between the transformation of plants and animals and the Easter story in	Baptism (1.7) The aim of this unit is to give pupils an understanding of 'church' as a holy place and a body of people so they can begin developing an understanding of what happens in church and	My World, Jesus' World (1.9) The aim of this unit is to help children understand that Jesus lived a long time ago and that the world we live in is very different to Jesus' world over 2000 years ago.

Year 3/4	have plenty, but others do not. Pupils will discuss what our response as Christians should be to the need of others. Harvest and the Jewish Festival of Sukkot (3.6) Explore further the meaning and purpose of Harvest Festival celebrations and the link to the Jewish festival of Sukkot. Experiences - Harvest festival Sukkot - Eating outside	Christmas: Exploring the symbolism of light (4.2) Understand and discuss the Christian belief that Jesus is the, 'Light of the World' and explore the metaphor of Jesus bringing light into people's lives. Christingle Divali Hannukkah	Jesus: The man who changed lives (3.3) Deepen our understanding into the impact Jesus had and still has on people's lives Vicar visit Mother Theresa Diversity - Martin Luther King	order to develop an understanding of the resurrection.	why. To give pupils an opportunity to begin exploring places of worship other than a church. Joseph (1.8) Change the world (S7) Think about the world in which they live, how some people have changed the world and how their faith supported this change.	Multicultural Christianity (S13) The aim of this unit is to talk and think about the first Christians and the spread of Christianity. Pupils will be given a simple introduction to understanding Christianity as a Multi- cultural and worldwide faith. Are all churches the same? Sacred Places. (4.5) Explore the concept that Christianity is a multi-cultural, worldwide faith and develop our understanding of places of worship from a range of faiths including; Christianity, Islam, Sikhism and Hinduism. Trips - Visit to a church / mosque
Year 5/6	The Lord's Prayer S2 Consider the meaning of the words of the Lord's Prayer and that it is the prayer that Jesus taught us to pray. Jesus the Teacher Visit to Church: Christian stations linked to activities using lines from the Lords prayer (volunteers from church to help run stations) -Christian Vision and values -Locality	How do Christians prepare for Christ? 6.2 Examine the themes of the season of Advent and the Christian belief that Jesus will return.	<section-header><text><text><text><text></text></text></text></text></section-header>	Why do Christians believe that Easter is a celebration of victory? 5.4 Explore the Easter story from the perspective of it being the story of	Pentecost 5.9 Investigate the lives and resilience of the early Christians; the significance of the life of St Paul and the concept of mission.	(Blackburn/Preston) Ideas about God 6.6 Reflect on the nature of God, His characteristics and His relationship with people.
			PSHE			

EYFS	Making friends, making relationships Build constructive and respectful relationships. Express their feelings and consider the feelings of others. Worry and adjusting to change: self- confidence and self- awareness Health and self-care Know and talk about the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating – tooth brushing	Learning the rules: managing feelings and behaviour Think about the perspectives of others. Express their feelings and consider the feelings of others. Worrying and adjusting to change: self- confidence and self –awareness	<section-header><section-header><text><text><text></text></text></text></section-header></section-header>	Managing feelings and behaviour – friendships, learning to share Think about the perspectives of others. Identify and moderate their own feelings socially and emotionally. Making relationships – caring for others See themselves as a valuable individual. Build constructive and respectful relationships.	Health and self-care Know and talk about the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating – tooth brushing - sensible amounts of 'screen time' - having a good sleep routine - being a safe pedestrian Road Safety	Health and self- care Managing feelings and behaviour – anger/worry Know and talk about the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating – tooth brushing - sensible amounts of 'screen time' - having a good sleep routine - being a safe pedestrian Making relationships – new beginnings, overcoming change Show resilience and perseverance in the face of challenge.
Year 1/2	Relationships What makes a good friend? The aim of this unit is to know how to make friends with others and recognise when they feel lonely and what they could do about it. They will understand how people behave when they are being friendly and what makes a good friend. They will learn strategies for how to resolve arguments that can occur in friendships and how to ask for help if a friendship is making them unhappy. The Bear and the Piano story, Edgar the Dragon	Relationships What is bullying? The aim of this unit is to know how words and actions can affect how people feel. They will know how to ask for and give/not give permission regarding physical contact and how to respond if physical contact makes them uncomfortable or unsafe. They will understand why name calling, hurtful teasing, bulling and deliberately excluding others is unacceptable including how to report it. Kindness - Bear and the Hare – John Lewis advert	Living in the Wider World What jobs do people do? Children will know how jobs help people earn money to pay for things they need and want. They will understand about a range of different jobs that celebrate the different strengths and interests people have to enable them to do different jobs. They will begin to understand how people use the internet and digital devices in their jobs and everyday life. Cultural Capital: jobs – female/male careers. STEM.	Health and Wellbeing What helps us to stay safe? Children will know how rules and restrictions help them to keep safe and how to identify risky and potentially unsafe situations and take steps to avoid or remove themselves from them. They will begin to understand how to resist pressure to do something that makes them feel unsafe or uncomfortable and how not everything they see online is true or trustworthy. They will see that people can pretend to be someone they are not and to tell a trusted adult if they are worried for themselves or others	Health and Wellbeing What helps us grow and stay healthy? Children will learn that different things help their bodies to be healthy, including food and drink, physical activity. They will learn the importance of physical activity and how much rest and sleep they should have everyday. They will learn there are different ways to learn and play; how to know when to take a break from screen-time. They will learn how sunshine helps bodies to grow and how to keep safe and well in the sun.	Health and Wellbeing How do we recognise our feelings? Children will learn how to recognise, name and describe a range of feelings Including what helps them to feel good, or better if not feeling good. They will know how different things / times / experiences can bring about different feelings for different people. They will discuss how feelings can affect people in their bodies and their behaviour and how to manage big feelings and the importance of sharing their feelings with someone they trust. Book: In my Heart – A Book of Feelings

Year 3/4	What strengths, skills and interests do we have? Discussing our	How can we manage our feelings? Explore our feelings and emotions, how	How do we treat each other with respect? Year 3/4	Shang Dynasty change the way of life? Children learn an overview of the achievements of ancient civilisations: Ancient Sumer - , Ancient Egypt, The Indus Valley and the Shang Dynasty. They follow an in-depth study of the Shang Dynasty and their achievements.	a child in the Stone Age? We explore how children lived in the Stone Age and learn knowledge of the period to compare this to how children live today and in living memory. Children learn about the tools early humans used, what life was like in a Stone Age settlement (Skara Brae) and why Bronze was used for tools and weapons. Children present what life was like for a child in the Stone Age focusing on change. Adapted Pearson Unit: Prehistoric Britain. Links to Local History maps and Thurnham Year 1/2 and Dogger – Toys EYFS CHRONOLOGY, CHANGE AND		Constantine/Mo Farrah – missing background What is the significance of the Lancashire Cotton Industry to the Lancashire Slave Trade? Children learn about The Lancashire Cotton Industry and its significance for the people of Lancashire (and beyond) in the past. Children will learn what life was like in their local area in the past (Preston or Lancaster) and how

how they created and used Chineseeveryday lives of people in the past as well as significar events and how buildings and land people in the people in the Shang Dynasty and how the Shang Dynasty changed the way of life.everyday lives of and how the earne where the cotton came from and the impact of the cotton industry on the lives of on similarities and differences between the civilisations.everyday lives of and differences share David cotton came from and differences between the cotton industry on the lives of share the cotton industry on the lives of people in the cotton industry on the lives of sought up i the transatlantic Slave Trade. Geography

EYFS	Journey to School Look at maps of our school/area and discuss the features they notice. Make their own maps. What is my journey to school like? Location & Place Children begin by exploring what they can see around our school (village hall, park, church, houses, pub). Link to seasonal changes. Draw a map of their journey from home to school including key places that they see on their way.	Celebrations Christmas, Diwali, Bonfire Night Recognise people have different beliefs and celebrate special times in different ways. Remembrance Day WW2 Past events in own lives and family members. Seasons – Autumn/Winter Explore the natural world around them. Describe what they see, hear and feel whilst outside. Changing seasons.	Planets Environments different to the one in which they live. Helen Sharman- first British astronaut Rockets and Life as an astronaut What is out there? Location and place Children begin with where we live and can name Cockerham village, England and planet earth. Look at a globe/map and recognise the land and the sea. Investigate what is beyond planet earth. Compare different environments and what we know about different planets. Consider what life would be like in space and find out about famous British astronaut Helen Sharman.	Castles Familiar situations in the past. The Royal Family Compare and contrast characters including figures from the past. Seasons-Spring Explore the natural world around them. Describe what they see, hear and feel whilst outside. Changing seasons. Special places	Farms around the World Machinery How it has changed (Farmer Parr's Visit) Make observations of animals and plants and explain why some things occur, and talk about changes. Maps Draw information from a simple map.	Looking after our World Explore the natural world around them. Sea Pollution Similarities and differences in relation to places and living things. Changes over time. The World (where have the children visited) Recognise some similarities and differences between life in this country and life in other countries. What is it like to be beside the seaside? Location, Environment Children make comparisons between where we live and life at the seaside. Find out about creatures that live in the sea, sky

Year 1/2 Wat k my cheat where do and four the fire of the plant of the pla

Find out about sea pollution and investigate what we can do to help to protect our oceans and the creatures that live there (Someone Swallowed Stanley text). Where has Eden Bear travelled? A visit from Eden Bear. Children will learn where Eden Bear has travelled and read the amazing books which have been written on a number of
a setting Theorem	Year 1/2	and local area like? Children identify key human and physical features in the school grounds and in Cockerham village using aerial maps and plan perspectives. They compare old and modern maps of the school and how the school has changed. They visit the nature trail at Patty's Barn and create a journey book using observational skills which they transfer into their own sensory maps with keys. They learn how to use a basic map and key with symbols. They ask 'What?', 'Who?' and 'Where?' questions and consider aspects to improve the nature reserve (Patty's Barn) for wildlife for future DT project. They learn that Cockerham is a rural village on the coast and some of the advantages and disadvantages of this	Beginning with Cockerham, home to the natterjack toad and the great crested newt children use maps to investigate the migration of the Whooper Swan and pink-footed goose to Cockerham marshes for winter from the Arctic and consider why these birds travel to warmer climates. They then look at the hottest and coldest places on Earth in relation to the Equator. They learn about the continents of the Earth and how temperature affects these places and the people and animals which live there. The children then research animals from all continents of the globe and consider their natural habitats. Location & Place Books: An anthology of intriguing animals. What it's like to be a bird. Launch of RSPB Wild Challenge. Photos of birds from Cockerham	Children look at the route of the England Coastal Path map and the names and location of seas surrounding the UK. They learn about considerations when routing the England Coastal Path from Glasson Bridge, past Cockerham to Pilling Amenity Area by looking at maps and land use. They consider access to nature versus environmental impact for animals, plants and farming and decide if people should be able to walk the Cockerham and English Coastline. They learn about the importance of the Morecambe Bay mud flats and salt marshes as a Site of Special Scientific Interest (SSSI) and the beauty and unique habitats in our locality. Decision-making Visit to Patty's Barn and walk along stretch

Philippians 4:13 "I can do all things through Christ who strengthens me"

	these skills next term in science as they go on a wildlife hunt. Location & place Fieldwork – Patty's Barn Nature Trail Fieldwork School grounds Maps: Lancashire archives Coastal Litter pick – Patty's Barn Focus Children: My favourite place.				Coastal litter-picking at Patty's Barn. Whole School Bio blitz.
Year 3/4 Why are rivers important to people? Children revisit learning on UK countries and capital cities to look at maps of the main rivers in the UK. They look at the major rivers of the world and learn about erosion, transportation and depositation. They learn about the water cycle. They look at the physical features of the Yellow River Valley (linked to Shang Dynasty in history) and the River Cocker leading to the Estuary of the River Lune focusing on vegetation belts and aquatic biomes. (Links to study of Morecambe Bay mud flats in Yr1/2). They learn about good river management and why rivers are so important to people around		ſ	What is the Earth made of? Overview of mountains, volcanoes and earthquakes. Children learn what mountains, volcanoes and earthquakes are and how mountains and volcanoes are formed. They conduct an in-depth study of mountains focusing on Wasdale in the Lake District and the Himalayas mountain region, home to Everest. They look at how fold mountains are formed and what attracts people to Everest and Wasdale in the Lake District. (Links to Ice age/ Stone age in history and rocks in science). LINK TO PEARSON UNIT MOUNTAINS, VOLCANOES AND EARTHQUAKES. Cause & effect/ Location & Place Visitor – climbing mountains RSPB Whole school Wildlife Challenge Launch	What are the challenges of nature? Children learn about how people have adapted to live in areas where nature poses a challenge. Children recap the challenges facing the residents of Cockerham and surrounding areas due to flooding (3/4 Cycle A) and look at effects of the coastal defences at Cleveleys and Blackpool. They learn about earthquakes and consider the challenges for the North American city of San Francisco due to Earthquakes. They explore the differing human geography and some of San Francisco's super structures linked to DT (Autumn term). They learn how people deal with earthquakes and the immediate and secondary effects of earthquakes. LINK TO PEARSON UNIT MOUNTAINS, VOLCANOES AND EARTHQUAKES. Location & place

	 compare and group materials together, according to whether they are solids, liquids or gases • observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) • identify the part played by evaporation and condensation in the water cycle and 	Year 3 • compare how things move on different surfaces • notice that some forces need contact between two objects, but magnetic forces can act at a distance • observe how magnets attract or repel each other and attract some materials and not others • compare and group together a variety of everyday materials on the	Year 3 What Plants Need • explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. Parts of Plants This unit also links to Y5 Life Cycles. • identify and describe the functions of different parts of flowering plants: roots, stem/ trunk, leaves and flowers • investigate the way in which water is	Year 3 This unit also links to Y6 Evolution and Inheritance. • compare and group together different kinds of rocks on the basis of their appearance and simple physical properties • describe in simple terms how fossils are formed when things that have lived are trapped within rock • recognise that soils	Year 4 • identify common appliances that run on electricity • construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers • identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery • recognise	Year 4 Grouping Living Things • recognise that living things can be grouped in a variety of ways • explore and use classification keys to help group, identify and name a variety of living things in their local and wider
	 compare and group materials together, according to whether they are solids, liquids or gases • observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) • identify the part played by evaporation and condensation in the water cycle and 	Year 3 • compare how things move on different surfaces • notice that some forces need contact between two objects, but magnetic forces can act at a distance • observe how magnets attract or repel each other and attract some materials and not others • compare and group together a variety of everyday materials on the basis of whether	Year 3 What Plants Need • explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. Parts of Plants This unit also links to Y5 Life Cycles. • identify and describe the functions of different parts of flowering plants: roots, stem/ trunk, leaves and flowers • investigate the way in which water is transported within	Year 3 This unit also links to Y6 Evolution and Inheritance. • compare and group together different kinds of rocks on the basis of their appearance and simple physical properties • describe in simple terms how fossils are formed when things that have lived are trapped within rock • recognise that soils	Year 4 • identify common appliances that run on electricity • construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers • identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery • recognise that a switch opens and closes a circuit and	Year 4 Grouping Living Things • recognise that living things can be grouped in a variety of ways • explore and use classification keys to help group, identify and name a variety of living things in their local and wider
	 compare and group materials together, according to whether they are solids, liquids or gases • observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) • identify the part played by evaporation and condensation in the water cycle and 	Year 3 • compare how things move on different surfaces • notice that some forces need contact between two objects, but magnetic forces can act at a distance • observe how magnets attract or repel each other and attract some materials and not others • compare and group together a variety of everyday materials on the basis of whether they are attracted	Year 3 What Plants Need • explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. Parts of Plants This unit also links to Y5 Life Cycles. • identify and describe the functions of different parts of flowering plants: roots, stem/ trunk, leaves and flowers • investigate the way in which water is transported within plants • explore the part	Year 3 This unit also links to Y6 Evolution and Inheritance. • compare and group together different kinds of rocks on the basis of their appearance and simple physical properties • describe in simple terms how fossils are formed when things that have lived are trapped within rock • recognise that soils	Year 4 • identify common appliances that run on electricity • construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers • identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery • recognise that a switch opens and closes a circuit and associate this with	Year 4 Grouping Living Things • recognise that living things can be grouped in a variety of ways • explore and use classification keys to help group, identify and name a variety of living things in their local and wider
	 compare and group materials together, according to whether they are solids, liquids or gases • observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) • identify the part played by evaporation and condensation in the water cycle and 	Year 3 • compare how things move on different surfaces • notice that some forces need contact between two objects, but magnetic forces can act at a distance • observe how magnets attract or repel each other and attract some materials and not others • compare and group together a variety of everyday materials on the basis of whether	Year 3 What Plants Need • explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. Parts of Plants This unit also links to Y5 Life Cycles. • identify and describe the functions of different parts of flowering plants: roots, stem/ trunk, leaves and flowers • investigate the way in which water is transported within	Year 3 This unit also links to Y6 Evolution and Inheritance. • compare and group together different kinds of rocks on the basis of their appearance and simple physical properties • describe in simple terms how fossils are formed when things that have lived are trapped within rock • recognise that soils	Year 4 • identify common appliances that run on electricity • construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers • identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery • recognise that a switch opens and closes a circuit and	Year 4 Grouping Living Things • recognise that living things can be grouped in a variety of ways • explore and use classification keys to help group, identify and name a variety of living things in their local and wider

Philippians 4:13 "I can do all things through Christ who strengthens me"

		magnetic materials • describe magnets as having two poles • predict whether two magnets will attract or repel each other, depending on which poles are facing.	plants, including pollination, seed formation and seed dispersal.		circuit • recognise some common conductors and insulators, and associate metals with being good conductors.	
Year 5/6	Earth and Space • describe the movement of the Earth, and other planets, relative to the Sun in the solar system • describe the movement of the Moon relative to the Earth • describe the Sun, Earth and Moon as approximately spherical bodies • use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. Visitor: Nick Lister from Planetarium at Rossall	Light and Sight • recognise that light appears to travel in straight lines • use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye • explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes • use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.	Forces • explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object • identify the effects of air resistance, water resistance and friction, that act between moving surfaces • recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect	Materials • compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets • give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.	Life Cycles • describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird • describe the life process of reproduction in some plants and animals • describe the changes as humans develop to old age.	Classifying Living Things • describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro- organisms, plants and animals • give reasons for classifying plants and animals based on specific characteristics.

Comp	Computing –Information Technology (IT), Computer Science (CS), Digital Literacy (DL)					
EYFS	Busy Bodies	Boats Ahoy				
	Patterns, Logic, Decomposition, Debugging, Algorithms, Abstraction	Tinkering, Patterns, Logic, Decomposition, Creating, Collaborating, Algorithms, Abstraction				
	Completes a simple program on a computer. Interacts with age-appropriate computer software.	Completes a simple program on a computer. Interacts with age- appropriate computer				

			software.
Year 1/2	 Online safety and exploring Purple Mash Unit 1.1 5 lessons Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies Animated stories Unit 1.6 5 lessons English – Little Red Reading Hood retelling Creating Pictures Unit 2.6 5 lessons Debug simple programs. Use logical reasoning to predict the behaviour of simple programs. Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Recognise common uses of information technology beyond school. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies. Geography – Creating maps and inserting images and text boxes. Art 	Spreadsheets Unit 1.8 In this unit we will be introduced to spreadsheets including adding images to a spreadsheet and using the image toolbox and how to use the speak and count tools in 2Calculate to count items. Unit 1.4 Technology outside school Unit 1.9 Grouping and sorting Unit 1.2 Unit 1.5 Lego builders 3 lessons Following and Creating Simple Instructions on the Computer and considering how the order of instructions affects the result. Unit 1.5 Maze Explorers – 4 lessons Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions. Create and debug simple programs.	Coding Unit 1.7 Coding Unit 2.1 Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions. Create and debug simple programs. Use logical reasoning to predict the behaviour of simple programs. Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.
Year 3/4	 3.1 Coding Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts. Unit 3.2 Online safety Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact. Unit 3.3 Spreadsheets Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information. 	 Unit 3.4 Touch Typing Pupils have developed their touch-typing skills and understand how to touch type using the home, bottom and top row keys using both hands. Unit 3.5 Email Pupils can list a range of ways the internet can be used to provide different methods of communication. Understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration. 	 Unit 3.6 Branching Databases Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information. Unit 3.7 Simulations Use sequence, selection, and repetition in programs; work with variables and various forms of input and output. Unit 3.8 Graphing Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.
Year 5/6	Coding Unit 5.1 Develop coding skills, decomposition, repetition, algorithms and reasoning whilst creating a game. 5.2 Online Safety Unit To mature understanding of the impact that sharing digital content can have and a greater awareness of reliability and safety when using the internet. 5.3 Spreadsheets To learn shortcuts, automated calculation formulae and use spreadsheets in real-life contexts.	Databases Unit 5.4 Learn how to search databases and create one on a topic of their choice. Game Creator Unit 5.5 To further develop their knowledge of a variety of software by using 2DIY3D to create a quest game.	3D Modelling Unit 5.6 Introduction to 2Design and Make and the skills of computer aided design. Concept Maps Unit 5.7 To develop knowledge of 2connect software to create a collaborative concept map.

			MFL			
Year 1/2	1			1	<u> </u>	
Year 3/4	Numbers a Revise the numbers 1-12 answer questions about t	Learn how to ask and	Animals & Colours Explore the different nouns used for animals and colours. Describe animals in French using their knowledge of colours.		The Hungry Caterpillar Learn the nouns for different fruits and the of the week. Read and appreciate the story of Hungry Caterpillar.	
Year 5/6	Seasons and Weather Learn to describe the weather; combine weather and seasons and describe the climate in different places. Study a French poem about Autumn and perform it in small groups.		Where in the world? Study the geography of France and some countries and their flags, describing them in French with colours. Learn the 'er' verb parler to speak and be able to say which languages they speak as well as saying where they live and where they come from.		Sports Pronounce cognate and other sports accurately text, applying phonics knowledge from previo years. Practise using a dictionary to look up unk words and describe sports using simple senter and state which sports they like/dislike.	
			Mathema			
EYFS	NumberNumberland – look at numbers 1-4 in detail.Represent 1 - 4 on fingers, on a tens frame and with objects.Join in with number songs.Recite numbers to 10 or beyond.Attempt to count objects, actions and sounds.Describe the size or shape of real-life objects (linked to Numberland)	Number Numberland numbers 6-10. Begin to recognise parts within numbers. Show accuracy when counting a group of up to 5/10 objects. Shape - Identify straight and curved sides on 2D shapes, and flat and curved faces on 3D shape (linked to Numberland).	Number Partitioning numbers – part whole models. Make up of teen numbers (10+) Subtracting to 5, then 10. Distance – length width height Mass/ weight Volume / capacity	Number Addition Subtraction Halving and doubling Number sense	Number Counting, comparing, ordering Part whole using addition and subtraction Fractions Distance Mass / weight Capacity / volume	Number Time – days of week order of events Money – sorting coin Space / prepositions Number sense Addition Subtraction
Year 1/2	Number and Place value (Year 1: within 10/ Year 2: within 100) Addition and subtraction (Year 1: within 10/ Year 2: within 100 and above)	(Year 1: within 10/ Year 2: within 100 and	2D and 3D shape Place value within 20 – Year 1 Money – Year 1 and 2 Addition and Subtraction within 20 – Year 1 Multiplication and division – Year 2	Multiplication and division – Year 1 and 2 Length and height – Year 1 and 2 Mass, capacity and temperature – Year 1/2 Volume – Year 2	Place Value within 50 – Year 1 Multiplication and division – Year 2 Fractions – Year 1 and 2 Geometry – Position and direction – Year 1 and 2	Geometry – Positic and direction – Year and 2 Place Value within 10 Year 1 Measurement - Tim

Year 3/4	Place value	Addition and	Multiplication and Division	Fractions	Fractions	Shapes
	Addition and Subtraction	Subtraction	Length and perimeter	Decimals	Decimals	Statistics
		Measurement: Area		Mass and Capacity	Money	Position and Direction
		Multiplication and Division			Time	
Year 5/6	Place Value	Addition and	Multiplication and Division	Decimals, Fractions and	Shape	Decimals
	Addition and Subtraction	Subtraction	Fractions	Percentages	Position and Direction	Negative numbers
		Multiplication and Division	Ratio	Area, Perimeter and Volume	Decimals	Converting units
		Fractions		Statistics	Decimais	Converting units
		Fractions	Algebra
